Payment Response

Tracking
Sucess / Failure

Technical Requirements

- **Frontend** • Responsive interface with page for Product listing, cart, checkout etc.

- **Backend** • Use Sanity cms² for data management.

- **API's** • Integrate for shipment tracking and payment.

- **Keywork flows**

1- **Registration** Uses sign up data start in sanity.

2- **Product Browsing** Fetch data from scheme API.

3- **Order Placement** 4 Order details same in sanity

4. Shipment Tracking ↳ Track status
via third party.

APIs/Endopoint

% Product (GET) • fetch product details
from Sanity.

% Order Post • Create a new order

% Shipment (GET) • Track order status
through third party Api.
